

OK_AC1360 Color GigE CCD camera

Features

- 1/2 inch color progressive area scan CCD
- Total pixels is 1300×1024
- GigE Vision compliant interface, up to 100 meter cable lengths for more flexibility
- By a variety of I/O features
- Save cost --no frame grabber required
- Exposure control/Gamma control/Frame rate control
- Variety I/O control interface.
- two GPIO input and output
- with a frame buffer, external trigger mode, you can save four images

Specifications

Frame rate	Up to 24hz
Pixel clock	40 Mhz
CCD sensor	1/2 inch color progressive
CCD size (mm)	7.6×6.2
Interface	Gigabit Ethernet (GigE Vision compliant)
Pixel size (µm)	4.65×4.65
Total pixels	1392×1040
resolution	1300×1024
Sensitivity(lux)	1.0
AD	10bit
SNR (db)	50
Max Exposure time (s)	2.8 (in external trigger mode)
Min Exposure time (s)	1/46000 (in free-running mode)
Gamma	0.45~1.0
Trigger input	TTL
environment	-10°C ~ +50°C
Humidity	20—80%
Storage temperature	-25°C~60°C/ 20%~90%
Computer system,	Windows series
Lens mount	C/CS mount

Application Fields

OK_AC1360 camera are perfect for use in applications such as:

- industry inspection
- science research
- medical imaging
- intelligent traffic systems
